File → Settings → Install → In the searchbox just type terminal → platform-ide-terminal → settings → Shell Override

C:\Windows\System32\cmd.exe

Django:

- ⊛ Django is a free and open-source web framework.
- ⊛ It is written in Python.
- ⊛ It follows the Model-View-Template (MVT) architectural pattern.
- ⊛ It is maintained by the Django Software Foundation (DSF)

- ⊛ It is used by several top websites like Youtube, Google, Dropbox, Yahoo Maps, Mozilla, Instagram, Washington Times, Nasa and many more
- ⊛ <https://www.shuup.com/blog/25-of-the-most-popular-python-and-django-websites/>
- ⊛ Django was created in 2003 as an internal project at Lowrence Journal-World News Paper for their web development.

- ⊛ The Original authors of Django Framework are: Adrian Holovaty, Simon Willison

- ⊛ After Testing this framework with heavy traffics, Developers released for the public as open source framework on July 21st 2005.

- ⊛ The Django was named in the memory of Guitarist Django Reinhardt.
